Cup of Pythagoras

Pythagoras was an Ancient Greek Philosopher and Mathematician mostly known for the Pythagorean Theorem: In a right-angled triangle, the square of the hypotenuse equals the sum of the squares of the 2 other sides. To show to his pupils the importance of "living in moderation" avoiding exaggeration, he designed this cup:

As we fill it with wine it holds up, but if you pour too much, all the wine will go to waste by means of the law of connected vessels. **ENJOY YOUR DRINKS IN MODERATION!**
